Welcome to the 10th Workshop on Lung Health Respiratory Diseases and Immune Response

Dear Colleagues & Friends,

It's a great pleasure – as Presidents and Chairmen – to welcome you to the **10th Edition of the International Workshop on Lung Health** which takes place from **January 19th to January 21st, 2023** in Nice (Saint Laurent du Var).

In 2023 we celebrate **the 10 Edition** of our **respiratory medicine international family Meeting**. As re-started in 2022, we look forward to welcoming you in Nice for this celebrating edition with an enthusiastic and rich **“on site”** event, keeping anyway the **hybrid format** that will allow the attendance of remote countries participants and people who could still have travel and job limitations.

The **fil rouge** of the *X International Workshop on Lung Health* has been defined: **“Respiratory Diseases and Immune Response”** is the main theme which embraces sessions, lectures and symposia. The pandemic taught us that the **correct reading and understanding** of the **Immune Response** could be one of the **most important ally in medical practice, fighting against virus, bacteria, pathologies and multifaceted conditions. Not considering** the Immune system in its **complexity and penetrating activity** could bring fatal errors.

During the 3 Workshop days we would face all the **major and outbreaking topics** of Respiratory Medicine: from **Asthma** and **COPD** to **Respiratory Infections**, reaching also the **Interstitial** and **Rare Diseases**, our aim is to give to participants and faculty the opportunity of a **new perspective** on these themes, where a **focus role** will be played by **Immune Response** facing these **pathologies and conditions**.

The **advocacy** of the International Workshop on Lung Health to **Youngs** will be enlarged once more during the X edition: a new contest – **LUNGoAIR** – will constitute an important occasion of **“melting pot”, exchange and challenge** for the Young Researchers and Clinicians from all over the World. The successful activities of **Rising Stars, FUHEL Programme** and **Posters Calls** will be protagonists - once again - of the Meeting.

The **peaceful environment** of Nice bay will welcome us at the end of January 2023, giving us the opportunity of **3 constructive working days**. We invite all of you, faculty, participants and pharma companies representatives to send us **any kind of suggestions** and ideas you could retain important to focus on. We look forward meeting your **enthusiasm in contributing** to the Workshop development by participating as well in the **Workshop Abstract Calls**, which will be **opened during the 2022 springtime**.

We invite you to enjoy the congress and actively contribute to its success!

Yours Sincerely,

The Organizing and Scientific Committee

Francesco Blasi, G. Walter Canonica, Johann Christian Virchow, Stefano Centanni, Tobias Welte

Stefano Aliberti, James D. Chalmers, Fabiano Di Marco, Enrico M. Heffler, Daiana Stolz

TOPICS & TRACKS

The Scientific Programme has been designed to face several challenges, hot topics and emerging issues of the field of Research in Respiratory Medicine. The same topics will be available for the Workshop Calls (Abstracts for Posters and Rising Stars)

Furthermore, to help participants to organize their attendance, based on their area of interest, the programme has been organized in thematic tracks.

**RED TRACK:
Respiratory Tract Infections**

- CAP – Community acquired Pneumonia
- COVID-19
- Bronchiectasis
- Human Metapneumovirus (hMPV)
- Multiple Drugs Resistant (MDR) Bacteria
- NTM
- Respiratory Syncytial Virus (RSV)

**BLUE TRACK:
Asthma & COPD**

- Allergy
- Atopy and Immunotherapy
- Chronic Bronchitis
- Corticosteroids
- Nasal Polyposis
- Neutrophilic inflammation
- Precision Medicine
- Sinusitis
- Treatments & New Drugs

**GREEN TRACK:
Respiratory Rare Diseases**

- Alpha1-antitrypsin deficiency
- ILD – Interstitial Lung Diseases
- IPF – Idiopathic Pulmonary Fibrosis
- Pulmonary Hypertension
- Eosinophilic granulomatosis with polyangiitis (EGPA)
- Lymphangiomyomatosis (LAM)
- Pulmonary Alveolar Proteinosis (PAP) Syndrome
- Primary ciliary dyskinesia (PCD)

Cross Tracks Topics

- Artificial Intelligence
- Imaging and other Diagnostic Tools in Respiratory Medicine
- Microbiomics
- New Drugs
- Vaccines
